Copying and Bisecting Angles

Part I: *Bisecting Angles, remember the rhombus! If you can construct a rhombus you can bisect an angle with the diagonal of the rhombus.*

1. What do you think it means to "bisect" an angle?
2. You can use circles to bisect the angle. Use your compass try and bisect the angle below.

Bisect all of the angles below, use a rhombus to help you!
